995 2.4 GHz Wi-Fi 25dbi RP-SMA

995 2.4 GHz

Wi-Fi 2.4 GHz, 25dbi, RP-SMA. This antenna is designed for use in various wireless communication systems, providing high gain and directional performance. It is compatible with standard Wi-Fi protocols and is suitable for both indoor and outdoor applications.

Frequency: 2.4 GHz

Connector: RP-SMA

Gain: 25dbi

Power: 30W

Å

Product description: This is a high-gain, directional antenna with a gain of 25dbi. It is designed for use in wireless communication systems, providing excellent performance in terms of signal strength and range. The antenna is compatible with standard Wi-Fi protocols and is suitable for both indoor and outdoor applications.

Key features include a frequency of 2.4 GHz, a power output of 30W, and an RP-SMA connector. The antenna is designed for use in various wireless communication systems, providing high gain and directional performance. It is compatible with standard Wi-Fi protocols and is suitable for both indoor and outdoor applications.
